MARINE PHOTOS & VIDEOS

1 excursion	USD 35 ⁺⁺
2 excursions	USD 70 ⁺⁺
3 excursions	USD 90 ⁺⁺

Effective from June 2015 onwards.

Welcome to the Marine Centre at Baros Maldives and our educational adventures

For all levels: **Coral Sponsorship: For those who want to give something back to our environment**

We invite those who care about the marine environment to become part of our reef generation programme by sponsoring a coral frame (name tag included) and learning how to grow coral fragments. Every six months you will receive an update on the growth of the nubbins as they develop on the table and attract numerous fish.

Step 1: **Private Snorkelling Lessons for beginners / Snorkelling Refresher** (private only)

With just an hour in the water, beginners can learn the basics of snorkelling and reef awareness, and will be escorted to the house reef by one of our Marine Biologists. Those who have little snorkelling experience but feel uncomfortable to take the dip on their own may want to opt for the Snorkelling Refresher.

Step 2: **House Reef Tour, with Fish ID** (available in group or private)

This tour begins in the Marine Centre with a relaxed 20-minute class about marine organisms, after which our Marine Biologist shows participants the best spots around the island. Since we have a strict "do not touch" policy on the island, this is the only chance to touch a few selected marine species under the supervision of a professional.

Snorkelling Safari by boat (available in group or private)

For snorkellers who have already explored all the nooks and crannies of the stunning house reef at Baros Maldives, it is time to join a Snorkelling Safari by boat and discover two more reefs with our Marine Biologist. Isolated reefs with cliffs and caves for animals to feed and live in are perfect spots for snorkellers to peep into this hidden fascinating world. We've got Black Coral Reef, The Playground, Shuga's Reef, Alibaba, Frog Reef, Heart Reef and Papaya Reef within just a few minutes' reach.

Step 3: **Night Snorkelling** (available in group or private)

After the sun sets, nocturnal creatures come out of their hiding places and make the reef their own for the night. Participants are armed with a powerful underwater flashlight to explore the reef at night. Witness plankton glowing in the dark, a phenomenon called bioluminescence.

'Glow-in-the-Dark' Snorkelling (Fluo Night Snorkelling) (private only)

Armed with special blue torches we discover a hidden world of fluorescence in corals and fish. The reflected light that you will see through your filter will amaze you with strong yellow, green and red neon colours. A truly unique, incomparable experience.

Step 4: **Snorkelling Specialty Courses to improve your skills** (private only)

Specialty courses are individually designed, so you tell us which skills you would like to improve. Learn the basics of underwater photography, get tips and tricks and hands-on experience on how to get your favourite animals on camera. Alternatively, you can choose to let us take your photographs in the surroundings of our beautiful house reef scene. Or let us introduce you into the world of free-diving by teaching you the basics of how to control your breathing, how to equalize and how to duck-dive to get prepared for a new perspective on the coral reef.

Please book directly at the Marine Centre in advance. Our phone extension is 415.

All prices are quoted in US Dollars and are subject to 10% service charge and 12% GST. All excursions are subject to weather conditions and group excursions to the min. number of guests. Please note that there is a 100% cancellation fee for no-shows and last minute cancellations. Excursions have to be cancelled 3 hours prior to the scheduled time, or the previous day before 18.00 if excursions take place in the morning.
